Subject: Microsoft Settlement

I feel the current proposed settlement is a very bad idea. It will only reinforce Microsoft's monopoly in the long term. This will only make it more difficult for competition to exist and it will leave the country and the world in a worse position than it is now with regard to Microsoft.

It is my hope that the settlement will be reevaluated and changed into something that solves the monopoly problem, instead of being something that essentially ignores the issue.

Thank you,

CS
